

Walking on a tightrope requires very good balance. Blondin walked across a tightrope that was over eleven hundred feet long—he had to balance for a long time! How good is your balance? Challenge the group to balance on the ground on one leg and see who can stay up the longest. What about on the opposite leg? Be sure to space everyone out and have an audience (spotter) to make sure everyone is safe. Balance on the ground only—anything higher is for professionals!
